

# Stefan Stevanović

Aspiring Computer Scientist | Software Developer

## Skills

### LANGUAGES & TOOLS:

## Projects

### Front end

I have developed multiple web pages and e-commerce sites using React and Node.js as part of freelance projects. My work includes building clean, responsive, and efficient user interfaces with a focus on performance and user experience.

### Low-level

### Programming

I have experience in low-level programming, including developing a custom text editor in C++ with advanced text manipulation and file handling capabilities. I am also building my own kernel and exploring bootloader development. Additionally, I have worked on a PDF-to-XML conversion tool and a C++ neural network for chatbot training. My work focuses on performance optimization, memory management, and system-level programming.

### Video editing

### & Graphic Design

I have been editing videos for my Instagram page for several months as a creative outlet, though coding remains my primary passion.

I have designed all my web pages, including their content, ensuring a cohesive and polished presentation.

### VIDEO EDITING & DESIGN:

## ABOUT ME

I am an 18-year-old high school student from Serbia, graduating with a perfect GPA (5.00). I plan to pursue a degree in Computer Science and have a strong passion for programming and problem-solving.

I thrive on tackling complex challenges and delivering efficient, high-quality solutions. My expertise spans multiple languages, including Javascript, Python, C++ and Rust.

## Future goals

I am committed to deepening my knowledge of programming and computer science. By the end of 2025, I will be studying Computer Science at the university level, focusing on both theoretical and practical aspects of the field.

My goal is to develop professionally by integrating my expertise across different areas, from low-level programming to front-end and backend development. I aim to continuously improve and take on challenging projects.
